

Laundry Machines
for any use

AQUASTAR
LAUNDRY SOLUTIONS

DOBLO' INCREASE YOUR BUSINESS OPPORTUNITY

When in your laundry shop there is not enough room for a professional water system, **DOBLO'** is the right solution: it is doubling the productivity for square meter!

DOBLO' was designed to give the possibility of a professional water service, also to the dry cleaning shop, which had to renounce to this business because of space problems.

Now everybody can offer to its customer the washing sense of freshness.

Available in more version, which are combining a professional washing machine with a stacked tumble dryer, **DOBLO'** is putting together the efficiency and reliability of **AQUASTAR** washing machine and tumble dryer.

High performance

100% Customer Satisfaction

A unique structure: washing machine and tumble dryer are stacked, so a professional laundry can fit in half space.

It is flexible: washing machine and tumble dryer are Completely independent; this characteristics enables the user to choose if the two machines need to work at the same time, or if they need to work in two different moments.

It is ECO: washing machines and tumble dryer were designed to avoid water and energy waste.

It is user friendly: IM8 and IM7, are the washing machine and tumble dryer control systems. They are absolutely simple and very intuitive to be used, thanks to the easy to understand icons and the possibility to dialog in more than 10 languages (on request other can be improved).

It can be customized: washing and drying programs, can be easily adapted to the needs of each laundry.

UNIQUE STRUCTURE SOLUTION

A tumble dryer stacked on a washing machine without any jutting part, the mechanic and electronic components are completely integrated in the machine structure.

ENERGY SAVING

The tumble dryer is equipped with a special insulation which increase its efficiency. The washing machine is equipped with automatic pumps which control the detergent measuring in a really precise way avoiding wastes.

HALF LOAD

Tank to the new MP8 computer, programs for half load can be created. The machine will proportionally and automatically reduce the water and detergent consumes.

WORKING IS EASY!

DOBLO' was designed to enable a medium height person to work in the most ergonomic way.

WORKING SAFE

The most modern safety systems were improved in AQUASTAR equipment to allow the user to work without worries.

HIGH QUALITY RESULTS

Latest technologies and customized program: AQUASTAR allows to treat the linen in the most professional way. The washed and dried items have the freshness that only a wet cleaning can assure.

Independency means freedom

Washing machine and tumble dryer are equip with two completely independent control systems.
